

Contents

PART ONE	The Slide Rule	1
	Care of the Slide Rule	2
	Accuracy of the Rule	4
	Reading Scale Graduations	5
	Construction of the Scales	9
	Multiplication	11
	Methods of Determining Decimal Point Location	13
	Division	18
	Combined Multiplication and Division	22
	Proportions and Ratios	26
	Folded Scales	27
	Squares and Square Roots	30
	Cubes and Cube Roots	33
	Trigonometric Functions	36
	Right Triangle Solution	44
	The Log-Log Scales	46
	Hyperbolic Functions	61
	Complex Numbers	64

PART TWO	The Engineering Method of Problem Solving	69
	Types of Thought Processes	73
	Reasoning and Problem Solving	75
	Order of Action in the Problem Solving Process	75
	Recognition of a Need and Identification of the Problem	76
	Search for Ideas, Incubation, and Evaluation of Alternatives	78
	Creative Synthesis and Design	79
	Simplifying Assumptions and Preparation of a Model	80
	Types of Idealized Models	81
	The Mathematical Model	81
	The Diagram	82
	The Scale Model	90
	The Simulation Model	92
	Experimentation, Verification, and Presenta- tion of the Solution	93
	Problems in Static Mechanics	99
	Resolution of Forces	101
	Moments	109
	Equilibrium	114
	Electricity and Electronics	121
	The Atom	121
	Electric Currents	122
	Laws and Principles	123
	Series Circuits	124
	Parallel Circuits	125
	Power	129
	Measurement of Electrical Quantities	130

APPENDIXES	Appendix I	
	Logarithms—The Mathematical Basis for the Slide Rule	137
	Appendix II	
	Trigonometry	141
	Appendix III	
	Geometric Figures	145
	Appendix IV	
	Tables	160
	Appendix V	
	Answers to Selected Problems	178
