1 CONTRACTED ARITHMETICAL CALCULATIONS Contracted multiplication and division—Difference of two squares—Binomial approximation	1
2 LOGARITHMS The use of tables	7
3 ORDINARY SLIDE RULE The cursor—The use of the upper scales of rule and slider	19
4 POWERS AND ROOTS Squares and square roots—Cubes and cube roots—Reciprocals	35
5 APPLICATIONS OF POWERS AND ROOTS Areas of circles—Volume of a cylinder—Volume of a sphere	39
6 REDUCTION AND CONVERSION Length — Weight — Capacity — Force and mass — Pressure—Velocity—Power—Percentages—Commercial applications—Interest—Railway clearing-house work	43
7 USE OF THE BACK OF THE SLIDER To find the logarithm of any given number	52
8 SINES AND TANGENTS OF ANGLES Cosines, cotangents, etc.	55
9 SOLUTION OF TRIANGLES Chord of an arc—Solution of triangles—Area of a triangle—Area of a regular polygon—Volume of a right cone or pyramid—Volume of the frustum	59

10 OTHER TYPES OF SLIDE RULES AND CALCULATORS	66
Perry's log-log scale—P.I.C. slide rule—Spiral scale calculators—Fuller's and Otis King's calculators—Circular (or watch-type) calculators—Fowler, long-scale vest pocket calculator	
11 EXAMPLES IN MECHANICS AND ENGINEERING	85
Laws of falling bodies—Resistance of a motor vehicle —Jet of water—Kinetic energy—Moment of inertia— Vibrations—Strength and deflections of materials— Helical springs—Carriage springs—Relations between elastic moduli—Tension in a hanging chain—Head wasted in friction in a straight length of clean water main—Horse-power of a reciprocating pump—Tension in a belt—Horse-power transmitted by a belt with maxi- mum tension T_1 —Centrifugal pull in a belt—Centri- fugal stress in pulley or flywheel rim—Expansion and compression curves for gases—Heat radiation— Velocity of sound in air—Electrical circuit with two conductors in parallel—Speed of propagation of an ether wave—Wave-length of a circuit at synchronism— Inductance of a coil—Insulation resistance of a cable— Forced vibrations with fluid damping—Angular acceleration of a slotted link—Plotting surveys— Methods of tabulation	
TABLES	116
Four-figure logarithms—Four-figure antilogarithms— Trigonometrical functions
