

CONTENTS

CHAPTER 1 INTRODUCTION

1.1	Becoming Proficient with the Slide Rule.	1
1.2	The Parts of a Slide Rule	2
1.3	Types of Slide Rules	2
1.4	Care and Adjustment of Your Slide Rule	2

CHAPTER 2 ELEMENTARY OPERATIONS

2.1	Getting Acquainted with the Scales	4
2.2	Reading the C and D Scales.	4
2.3	Multiplication of Two Numbers, Each Between 1 and 10, Whose Product Is Between 1 and 10	5
	Exercise 1.	7
2.4	Multiplication of Any Two Numbers Between 1 and 10	7
	Exercise 2.	8
2.5	Scientific Notation.	8
2.6	Multiplication of Any Two Numbers	10
	Exercise 3.	11
2.7	Slide Rule Accuracy; Significant Figures	12
2.8	Multiplication of More Than Two Numbers.	13
	Exercise 4.	15
2.9	Division of One Number by Another	16
	Exercise 5.	18
2.(10)	Problems Involving Any Number of Multiplications and Any Number of Divisions	19
2.(11)	Summary of Multiplication and Division with the C and D Scales.	23
	Exercise 6.	24
2.(12)	Proportion Problems (Containing Only First Powers).	25
	Exercise 7.	28
2.(13)	Squares and Square Roots of Numbers.	29
	Exercise 8.	30
2.(14)	Square Root of the Sum or Difference of Two Squares	31
2.(14)1	Square Root of the Sum of Two Squares	31

CONTENTS

2.(14)1	Square Root of the Sum of Two Squares	31
2.(14)2	Square Root of the Difference of Two Squares	33
2.(15)	Cubes, and Cube Roots of Numbers	34
	Exercise 9	35
2.(16)	Proportion Problems (Containing First Powers, Squares, and Cubes)	36
2.(16)1	Type: x Varies As y^2	36
2.(16)2	Type: x Varies Inversely As y^2	37
2.(16)3	Type: x Varies As y^3	38
2.(16)4	Type: x^2 Varies As y^3	39
2.(17)	Some Uses of the CI Scale	39
2.(18)	The Folded Scales, CF and DF	42
2.(19)	Arranging Computations for Solution by Slide Rule	43
2.(20)	Conclusion, Chapter 2	45

CHAPTER 3 HISTORY AND THEORY OF THE SLIDE RULE

3.1	Exponents and Logarithms	46
3.2	Invention of the Slide Rule	47
3.3	The L Scale	47
3.4	Application of the Theory in the Use of the Elementary Slide Rule Scales	48

CHAPTER 4 USE OF THE TRIGONOMETRIC SCALES

4.1	The Trigonometric Functions and the "Standard" Right Triangle	50
4.2	Various Trigonometric Scale Arrangements	50
4.3	Getting Acquainted with the Trigonometric Scales	51
4.31	Angle Subdivisions -- Tenths or Minutes	51
4.32	Number of Trigonometric Scales	52
4.321	Three Trigonometric Scales	52
4.322	Two Trigonometric Scales	54
	Exercise 10	54
4.4	Solving the Right Triangle	55
4.41	An Acute Angle and the Hypotenuse Are Given	56
4.42	An Acute Angle and One of the Legs Are Given	58
4.43	A Leg and the Hypotenuse Are Given	61
4.44	The Two Legs Are Given	64
4.45	Summary of Procedures for Solving the Right Triangle with the Slide Rule	65

CONTENTS

	Exercise 11	66
4.5	Solution of the Oblique Triangle	69
4.51	Any Two Angles and a Side Are Given	69
4.52	Two Sides and the Angle Opposite One of Them Are Given	71
4.53	Two Sides and the Included Angle Are Given	71
4.54	The Three Sides Are Given	72
4.6	Concluding Remarks.	73
CHAPTER 5 USE OF THE LOG-LOG SCALES		
5.1	Number of Log-Log Scales and Various Arrangements	75
5.2	Ranges of the Log-Log Scales	76
5.3	Theory of the Log-Log Scales	76
5.4	Using the Log-Log Scales to Obtain Natural Logarithms of Numbers, and to Find Powers of e	77
	Exercise 12	79
5.5	Using the Log-Log Scales to Raise a Given Number to a Given Power.	80
5.51	The Given Number Is Greater Than One	80
5.52	The Given Number Is Less Than One.	81
5.53	Summary: Raising a Number to a Power	83
5.6	Using the Log-Log Scales to Extract a Given Root of a Given Number.	84
5.7	Using the Log-Log Scales to Find the Power One Given Number Is of Another	86
5.8	Solution of Certain Problems by Means of the Log-Log Scales When One or More of the Numbers Involved Are Negative	88
5.81	Finding Positive Integral Powers and Roots of Given Negative Numbers	88
5.82	Raising a Given Number to Any Negative Power.	88
5.83	Extracting Any Negative Root of a Given Positive Number	89
5.84	Finding the Power One Given Number Is of Another When One of the Given Numbers Is Greater Than One and the Other Is Less Than One.	89
	Exercise 13	90
5.9	Conclusion.	91
