Some Recommended Slide Rules	xi
Mounting Brackets for Classroom Demonstration Slide Rules	xvii
1. Reading Scales and Division	1
1-1. Parts of the Slide Rule, 1. 1-2. Scales, 1. 1-3. Small Space Values on Scales, 2. 1-4. Rounding Off Numbers, 4. 1-5. Division, 4. 1-6. Accuracy, 5. 1-7. Drill Problems, 5. 1-8. Decimal Point by Approximation, 6. 1-9. Drill Problems, 7. 1-10. Scientific Notation, 7. 1-11. Drill Problems, 8. 1-13. Drill Problems, 9.	
2. Square, Square Roots, Cubes, Cube Roots	11
2-1. Squares of Numbers on Slide Rules Having the A- and B-Scales, 11. 2-2. Squares of Numbers on Slide Rules NOT Having the A- and B-Scales, 11. 2-3A. Square Roots of Numbers, 12. 2-3B. Determining the First Digit and the Decimal Point for the Square Root of a Number, 12. 2-3C. Square Root Examples for Finding the First Digit of the Answer and the Location of the Decimal Point, 13. 2-4. Cubes of Numbers on Slide Rules Having the K-Scale, 14. 2-5. Cubes of Numbers Using the Pickett Slide Rules having the $\sqrt[3]{\quad}$ -scales, 15. 2-6A. Cube Roots of Numbers, 15. 2-6B. Cube Roots on Slide Rules Having the K-Scale, 16. 2-6C. Cube Roots on the Pickett Model 4 Slide Rule, 16. 2-7. Drill Problems, 17.	
3. Multiplication and Decimal Points	18
3-1. Multiplication, 18. 3-2. Drill Problems, 18. 3-3. Drill Problems, 19. 3-4. Establishing the Decimal Point by Approximation, 19. 3-5. Establishing the Decimal Point by Using the Scientific Notation Method, 20. 3-6. Drill Problems, 20. 3-7. The Slide Rule as an Instrument of Logarithms, 20. 3-8. Characteristics of Numbers, 21. 3-9. Multiplication, the Addition of Logarithms, 21. 3-10. The Characteristic Method for Determining the Decimal Point, 23. 3-11. Rule for the Decimal Point in Division, 23. 3-12. Drill Problems, 23.	
4. Combined Operations	25
4-1. Combination Multiplication and Division Problems, 25. 4-2. Drill Problems, 25. 4-3. Denominator Containing More Factors than the Numerator, 25. 4-4. Drill Problems, 26. 4-5. Same Number of Factors in Numerator and Denominator, 26. 4-6. Establishing the Decimal Point by Using the Scientific Notation Method, 26. 4-7. Locating the Decimal Point by the Characteristic Method, 28. 4-8. Drill Problems, 29. 4-9. Products of a Number and the Square Root of a Number, 29. 4-10. Drill Problems, 30. 4-12. Drill Problems, 32.	
5. L-, CF-, and DF-Scales and Combination Problems	34
5-1. Logarithm of a Number to the Base 10, 34. 5-2. Finding the Antilogarithm of a Number, 34. 5-3. Drill Problems, 34. 5-4. Exponential Equations Solved by Logarithms, 35. 5-6. Multiplying by Pi (π). 5-8. Dividing by Pi (π), 36. 5-10. CF- and DF-Scales Used in Conjunction with the C- and D-Scales, 37. 5-11. Drill Problems, 38.	

6. Ratio and Proportion	40
6-1. Ratio and Proportion Defined, 40. 6-2. Solutions of Some Common Types of Proportion Problems, 40. 6-3. To Change Degrees to Radians or Radians to Degrees, 41. 6-4. Drill Problems, 42.	
7. Percentage Problems	44
7-1. Changing a Number to a Per Cent, 44. 7-3. Basic Terminology, 45. 7-4. Three Types of Percentage Problems, 45. 7-5. Drill Problems, 46. 7-6. Miscellaneous Examples, 47. 7-7. Drill Problems, 49.	
8. Circle Problems	51
8-1. Circumference of a Circle, 51. 8-2. Area of a Circle, 51. 8-3. Volume of a Right Circular Cylinder, 52. 8-4. Drill Problems, 53.	
9. CI-, CIF- and DI-Scales	55
9-1. Reciprocal or Inverted Scales, 55. 9-3. Drill Problems, 57. 9-2. Multiplication Using the Reciprocal Scales, 55. 9-3. Drill Problems, 57. 9-4. An Examination Over the First Nine Chapters, 58.	
10. Trigonometric Functions (S-, ST- and T-Scales)	59
10-1. Trigonometric Functions Defined, 59. 10-2. Use of the S-Scale, 59. 10-3. Sine and Tangent of Angles 0.6° to 5.74° . ST (Sine-Tangent) Scales, 60. 10-4. Cosine of an Angle, 60. 10-5. T (Tangent) Scale, 60. 10-6. Finding the Cotangent, Secant and Cosecant of Angles, 61. 10-7. Sines and Tangents of Angles Less Than One Degree, 61. 10-8. Sines and Tangents of Angles Less Than One Degree on the Aristo, Keuffel & Esser, Pickett and Post Versalog Slide Rules, 62. 10-9. Sines and Tangents of Angles Less Than One Degree on the Dietzgen Slide Rule, 63. 10-10. Summary of Characteristics Values for Sine, Cosine and Tangent Functions, 63. 10-11. Operations Involving Trigonometric Functions, 63. 10-12. Drill Problems, 65.	
11. Solution of the Right Triangle and the General Triangle When the Law of Sines Applies . .	67
11-1. Standard Notation for Lettering Triangles, 67. 11-2. Law of Sines, 67. 11-4. Sine, Cosine and Tangent Functions Applied to the Solution of Right Triangles, 69. 11-7. Area of a Right Triangle, 73. 11-8. Drill Problems, 74.	
12. General Triangles	75
12-1. Solutions for General Triangles, 75. 12-2. Functions of Angles Between 90° and 180° , 77. 12-3. Law of Cosines, 77. 12-4. The Solution of a Triangle When the Sides Are Known, 78. 12-5. The Ambiguous Case, 80. 12-6. Drill Problems, 81.	
13. Powers of Numbers Using the Log Log-Scales	83
13-1. Some Examples, 83. 13-2. Basic Terminology (Base, Exponent, Power and Logarithm), 84. 13-3. Basic Features of the Log Log-Scales, 84. 13-4. Basic Features of the Log Log-Scales on the Pickett Model 4 Slide Rule, 86. 13-5. Rules for Determining Which LL-Scale to Use When Raising Numbers to Powers, 87. 13-6. Examples of Raising Numbers to Powers, Using the Pickett Model 4 Slide Rule, 88. 13-7. Finding Powers of e on the Pickett Model 4 Slide Rule, 89. 13-8. A general Rule Concerning Powers of Numbers, 89. 13-9. Drill Problems, 90.	
14. Logarithms of Numbers to Any Base and Roots of Numbers	91
14-1. Logarithm of Numbers to the Base e on Slide Rules which Use e as the Base for the Log Log-Scales, 91. 14-2. Finding Logarithms of Numbers to the base e on the Pickett Model 4 Slide Rule, 92. 14-3. Logarithms of Numbers to Any Base, 93. 14-4. Logarithms of Numbers in the Neighborhood of 1, 95. 14-5. Finding Roots of Numbers, Using the LL-Scales, 95. 14-6. Drill Problems, 97.	
15. Reciprocals and Exponential Expressions Solved With the Log Log-Scales	98
15-1. Finding the Reciprocal of a Number, Using the LL-Scales on Slide Rules with e as the Base for the LL-Scales, 98. 15-2. Finding the Reciprocal of a Number, Using the LL-Scales on the Pickett Model 4 Slide Rule, 99. 15-3. Underlying Principles Involved in Finding Powers of Numbers, 99. 15-4. Solving Exponential Equations on the LL-Scales, Using Slide Rules Having e as the Base for the LL-Scales, 101. 15-5. Solving Exponential Equations on the LL-Scales, Using the Pickett Model 4 Slide Rule, 102. 15-6. A Final Word of Caution, 102. 15-6. Drill Problems, 103.	

Final Examinations	105
Appendices	107
A-1. The LLO- and LLOO-Scales, 107. A-2. Finding Powers of Numbers Less Than One, 108.	
A-3. Miscellaneous Problems Solved on the LLO-Scales, 109. A-4. Logarithms of Numbers to Any Base, 109.	
Numerical Tables:	
I. Four-place Logarithms, 111	
II. Trigonometric Functions for Angles, 113	
III. Natural Logarithms of Numbers, 114	
Answers	115
Index	127
