

C O N T E N T S

CHAPTER 1 NUMBER SYSTEM AND NUMBER SENSE (Pages 1-59)

1-1	Place-Names In Whole Numbers	1
1-2	Place-Value In Whole Numbers	3
1-3	The Digit "0" As A Place-Holder	6
1-4	Naming Whole Numbers	7
1-5	Place-Names To The Right Of The Decimal Point	10
1-6	Place-Value In Non-Whole Numbers	17
1-7	"0" As A Place-Holder To The Right Of The Decimal Point	19
1-8	Naming Non-Whole Numbers Between 0 And 1	21
1-9	Naming Non-Whole Numbers Greater Than 1	27
1-10	Equivalent Decimal Fractions	31
1-11	Equivalent Decimal Numbers	37
1-12	Grouping By Tens In Decimal Numbers	42
1-13	Number Sense With Whole Numbers	47
1-14	The Position Of Non-Whole Numbers On Scales	49
1-15	Comparing Non-Whole Numbers	53

CHAPTER 2 ROUNDING AND ROUGH ESTIMATION (Pages 60-109)

2-1	The Purpose And Basic Principles Of Rounding	60
2-2	Tens-Numbers, Hundreds-Numbers, And So On	62
2-3	Rounding To The Nearest Ten, Hundred, And So On	66
2-4	Rounding "Halfway Between" Numbers	69
2-5	Shortcut Rules For Rounding	71
2-6	Rounding Non-Whole Numbers	75
2-7	Rounding To A Definite Number Of Digits	80
2-8	Estimation And Multiplication - Checking The "Sense" Of Products	82
2-9	Estimation And Division - Checking The "Sense" Of Quotients	89
2-10	Estimating Answers For Additions And Subtractions	97
2-11	The Need For Estimation When Using A Slide Rule	99

CHAPTER 3 INTRODUCTION TO SLIDE RULE (Pages 110-160)

3-1	Reading And Setting "One-Digit" Numbers On The C And D Scales	110
3-2	Reading And Setting "Two-Digit" Numbers On The C And D Scales	113
3-3	Multiplying "One-Digit" And "Two-Digit" Numbers On The Slide Rule	119
3-4	Reading And Setting "Three-Digit" Numbers On The C And D Scales	127
3-5	Multiplying "Three-Digit" Numbers On The C And D Scales	134
3-6	Reading And Setting A "Fourth" Digit On The C And D Scales	138
3-7	Practice Problems In Slide Rule Multiplication	143
3-8	Multiplying Three Or More Numbers On The Slide Rule	146
3-9	Simple Division On The Slide Rule	150
3-10	Further Work In Slide Rule Multiplication And Division	155

<u>CHAPTER 4</u> <u>POWERS OF TEN</u> (Pages 161-210)		
4-1	The Meaning Of Powers Of Ten With Positive Whole-Number Exponents	161
4-2	Multiplication and Division Of Powers Of Ten With Positive Whole-Number Exponents	164
4-3	The Meaning Of 10^0	166
4-4	Powers Of Ten With Negative Whole-Number Exponents	169
4-5	Powers Of Ten With Negative Whole-Number Exponents In Multiplication And Division	172
4-6	The Reciprocals Of Powers Of Ten And Divisions	175
4-7	Combined Multiplication And Division Of Powers Of Ten	178
4-8	Multiplying And Dividing Regular Numbers By Powers Of Ten	180
4-9	Writing Regular Numbers As A Factor Times A Power Of Ten	186
4-10	Numbers In Standard Notation	190
4-11	The Decimal Number System And Powers Of Ten	194
4-12	Writing Numbers In Multiplication-Form With A Particular Power Of Ten	200
4-13	Comparing Numbers Written In Multiplication-Form	207
<u>CHAPTER 5</u> <u>SLIDE RULE MULTIPLICATION AND DIVISION</u> (Pages 211-289)		
5-1	The Standard-Notation Method Of Estimating Products	211
5-2	Some Shorter Direct Methods Of Estimating Products	222
5-3	Multiplying Two Factors On The Slide Rule	233
5-4	Slide Rule Multiplications With Three Or More Factors	236
5-5	Estimating Quotients When The Denominator Is A Number Between 1 And 10	239
5-6	Use Of "Decimal Point Shifts" In Estimating Quotients	246
5-7	Estimating Quotients By Means Of Powers Of Ten	250
5-8	Finding Quotients On The Slide Rule	257
5-9	Three Types Of Combined Multiplication And Division Problems	260
5-10	Estimating Answers To Problems Involving Combined Multiplication And Division	270
5-11	Further Slide Rule Problems Involving Combined Multiplication And Division	277
5-12	Applied Problems In Combined Multiplication And Division	279
5-13	The CI Scale - Reciprocals And Multiplications	283
<u>CHAPTER 6</u> <u>SLIDE RULE POWERS AND ROOTS</u> (Pages 290-342)		
6-1	Squaring Numbers On The Slide Rule	290
6-2	The Square Roots Of Numbers Between 1 And 100	299
6-3	The Square Roots Of Numbers Of Any Size	303
6-4	The Grouping Method And Square Roots	309
6-5	Finding Approximate Square Roots	316
6-6	Cubing Numbers Between 1 And 10	319
6-7	Cubing Numbers Of Any Size	324
6-8	Cube Roots Of Numbers Between 1 And 1,000	327
6-9	Cube Roots Of Numbers Of Any Size	333
6-10	The Grouping Method And Cube Roots	338
<u>CHAPTER 7</u> <u>RATIO, PROPORTION, PERCENT</u> (Pages 343-402)		
7-1	The Meaning Of Ratios	343
7-2	Solving Proportions Algebraically	351
7-3	Solving Proportions On The Slide Rule	357
7-4	Applied Problems Involving Ratios And Proportions	364
7-5	The Meaning Of Percents Between 0% And 100%	369
7-6	Some Special Percents Between 0% And 100%	376

7-7	Solving Ratio-Percent Equations	381
7-8	Sentences And Ratio-Percent Equations	386
7-9	Applied Problems And Ratio-Percent Equations	392
7-10	Percents Greater Than 100%	397
7-11	Percents Less Than 1%	401

CHAPTER 8 INTRODUCTION TO LOGARITHMS (Pages 403-482)

8-1	A Review Of The Laws Of Exponents	403
8-2	The Meaning Of Fractional And Decimal Exponents	413
8-3	Laws Of Exponents With Fractional And Decimal Exponents	419
8-4	The Power-Of-Ten Form Of Any Positive Number Between 1 And 10	423
8-5	The Power-Of-Ten Form Of Positive Numbers Greater Than 10	431
8-6	The Meaning Of The Term "Logarithm"	436
8-7	The Basic Power-Of-Ten And Logarithmic Equations	438
8-8	Multiplication And Division By Means Of Powers Of Ten And Log Notation	444
8-9	Powers And Roots By Means Of Powers Of Ten And Log Notation	451
8-10	Negative Logarithms - Numbers Between 0 And 1	457
8-11	The "Mantissa" And "Characteristic" Of A Logarithm	462
8-12	Conversion Of Negative Logarithms To Regular Numbers	467
8-13	Power-Of-Ten And Log Equations With Negative Logarithms	472
8-14	Calculations Involving Negative Logarithms	475
8-15	Laws Of Logarithms	481

CHAPTER 9 MEASUREMENT CONCEPTS (Pages 483-554)

9-1	The Approximate Nature Of Measurement	483
9-2	The Precision Of Measurements	489
9-3	Upper And Lower Limits Of A Measurement	492
9-4	Absolute Error Of A Measurement	499
9-5	Use Of Non-Decimal Scales In Measurement	501
9-6	Addition And Subtraction Of Measurements	512
9-7	The Relative Error Of Measurements	518
9-8	The Accuracy Of Measurements	523
9-9	Significant Digits In Measurements	528
9-10	Significant Digits, Relative Error, And Accuracy	535
9-11	Multiplication And Division Of Measurements	540
9-12	Estimating Final Digits When Reading Measurement Scales	548
9-13	Other Sources Of Error In Measurement	553

CHAPTER 10 GEOMETRIC FORMULA EVALUATION (Pages 555-618)

10-1	Rectangles And Squares	555
10-2	Parallelograms	561
10-3	Triangles	566
10-4	Right Triangles And The Pythagorean Theorem	574
10-5	Isosceles Triangles	583
10-6	Circles	586
10-7	Trapezoids And Composite Figures	595
10-8	Volumes Of Right Prisms	600
10-9	Other Volumes And Surface Areas	611
10-10	Density And Weight	616
