| INTRODUCTION | vii |
| NOTE TO THE READER | ix |
| 1. SCALES AND POWERS | 1 |
| Definition of scale (1) — definition of logarithm (5) — multiplication of powers of ten (15) — division of powers of ten (14) — division with logarithms (14) — exponents and factors (15) — multiplication by logarithms (14) — negative powers (24) — negative logarithms (27) — definition of reciprocal (27). | |
| 2. THE C AND D SCALES | 40 |
| Using logarithms (40) — logarithms of the first ten integers (59) — basic principles of the slide rule (60) — using the C and D scales (88) — approximating the answer (82) — reducing a number to scientific notation (82) — negative exponents (93) — the right and left indexes (97) — definition of proportion (97) — definition of a unit (113). | |
| 3. THE A, B, AND K SCALES | 115 |
| Using the A scale (119) — extracting square roots (124) — interaction of the A and B scales (135) — the cube (K) scale (149) — extraction of cube roots (152) — extracting roots other than squares and cubes (153). | |
| 4. THE CI SCALE | 167 |
| Reciprocals (167) — the Reciprocal (CI) scale (180) — the right-hand index of the CI scale (173) — the left-hand index of the CI scale (178) — using reciprocals to limit re-indexing (181) — multiplying by the same factor (206) — converting measurements (209). | |

| | |
|--|-----|
| 5. THE L SCALE | 216 |
| The L scale as a table of logarithms (216) — converting numbers to logarithms (216) — antilogs (221) — converting a negative logarithm (231) — using the L scale to check problems (238). | |
| 6. APPLICATIONS | 239 |
| Accuracy of measurement (247) — solving for the weight of a sphere (258) — finding the circumference of an orbit (255) — area of a sphere (266) — changing miles to knots (269). | |
| 7. TRIGONOMETRY | 284 |
| Constant ratios (285) — right triangles and similar triangles (288) — sum of the angles of a triangle (289) — corresponding sides of similar triangles (292) — degrees, minutes, and seconds (296) — definition of sine, cosine, and tangent (319) — trigonometric identities and Pythagorean theorem (325). | |
| 8. THE S AND T SCALES | 345 |
| The sine (S) scale (345) — SRT or ST scale (361) — law of sines (384) — solving triangles that are not right triangles (393) — law of cosines (404) — the tangent (T) scale (421) — the “folded” scales (446) — log-log scale (447). | |
| 9. REVIEW WITH APPLICATIONS | 448 |
| The rod intercept in surveying (448) — applications in engineering and physics (453) — space and missiles (459) — measurement of the earth’s diameter (460). | |
| INDEX | 467 |
