

## CONTENTS

	Page
<b>PROLOGUE (How a Slide Rule Works) . . . . .</b>	<b>ix</b>
<b>UNIT I. SLIDE RULE BASICS</b>	
Lesson 1. Description . . . . .	1
2. Adjustment of the Rule . . . . .	3
3. Adjustment of the Indicator . . . . .	5
4. Reading the Scales . . . . .	7
5. The Scales continued . . . . .	9
Unit I Quiz . . . . .	11
<b>UNIT II. MULTIPLICATION AND DIVISION (C and D Scales)</b>	
Lesson 6. Simple Multiplication . . . . .	13
7. Simple Division . . . . .	19
8. Finding the Reciprocal . . . . .	21
9. Extended Multiplication . . . . .	23
10. Alternate Multiplication and Division . . . . .	25
Quick Reference - Methods of Problem Solution . . . . .	29
Unit II Quiz . . . . .	31
<b>UNIT III. TO DO LESS SLIDING AND TO USE PI (CF and DF Scales)</b>	
Lesson 11. Introduction to Pi and to the CF and DF Scales . . . . .	35
12. Using CF and DF to Do Less Sliding . . . . .	37
13. Use of Pi and the Folded Scales . . . . .	39
14. Use of Pi continued . . . . .	41
Unit III Quiz . . . . .	43
<b>UNIT IV. RECIPROCALS AND FLEXIBILITY (CI, DI and CIF Scales)</b>	
Lesson 15. Introduction to the CI, DI and CIF Scales . . . . .	45
16. Finding the Reciprocal in a different Way . . . . .	47
17. Extended Problems Using the CI and CIF Scales . . . . .	49
18. Extended Problems continued . . . . .	51
Quick Reference - Methods of Problem Solution . . . . .	53
Unit IV Quiz . . . . .	55
<b>UNIT V. SQUARES, CUBES AND THEIR ROOTS (A, B and K Scales)</b>	
Lesson 19. Introduction to the A and B Scales . . . . .	57
20. Square and Square Root - A and B Scales . . . . .	59
21. Square Root - C, CI and D Scales . . . . .	63
22. Cubes and Cube Roots - The K Scale. . . . .	65
Unit V Quiz . . . . .	67

## UNIT VI. TRIGONOMETRIC FUNCTIONS (S, T and ST Scales)

Lesson	23. Introduction to the S Scale . . . . .	69
	24. Sines of Angles . . . . .	71
	25. Cosines of Angles . . . . .	73
	26. The T Scale - Tangents and Cotangents . . . . .	75
	27. The ST Scale . . . . .	77
	28. Tangents Above 45° and Cotangents Below 45° . . . . .	79
	29. Tangents Above 84° and Cotangents Below 5° . . . . .	81
	30. Secants and Cosecants . . . . .	83
	31. Small Angles - Radians . . . . .	85

## UNIT VII. REVIEW AND QUIZ

Lesson	31. Quick Reference - Methods of Problem Solution . . . . .	87
	32. Quiz . . . . .	89
	Answers to Quiz Problems . . . . .	93

## UNIT VIII. TECHNIQUES FOR SOLVING TRIANGLES

Lesson	33. Introduction to Triangles . . . . .	95
	34. Given Two Angles and One Side (ASA) . . . . .	97
	35. Given Two Sides and the Included Angle (SAS) a. Finding the Area . . . . .	101
	b. Finding the Missing Angles and Side . . . . .	103
	c. Old Methods of Solving SAS Problems . . . . .	107
	36. Given Three Sides and No Angles (SSS) a. Finding the Angles Using Trial-and- Error Method . . . . .	109
	b. Finding the Area . . . . .	111
	c. Finding the Angles Using the Law of Cosines . . . . .	113
	37. Given Two Sides and a Non-Included Angle (SSA) a. Method of Solution . . . . .	115
	b. Subcases and Examples . . . . .	117
	Unit VIII Quiz . . . . .	121

## UNIT IX. APPLYING THE PYTHAGOREAN THEOREM

Lesson	38. Finding the Hypotenuse . . . . .	123
	39. Finding an Adjacent Side . . . . .	125
	40. The SAS or SSA Method of Solution . . . . .	127
	41. The Tangent and Sine Method . . . . .	129
	42. The Middle A Index Method . . . . .	131
	43. Addition and Subtraction . . . . .	133
	44. The Vector Scale . . . . .	135
	Unit IX Quiz . . . . .	137

## UNIT X. NUMBERS TO ANY POWER-NATURAL AND COMMON LOGS (L and LL Scales)

Lesson	45. Introduction to the Log Scales . . . . .	139
	46. Taking a Number to a Power . . . . .	141
	47. The Log Log Scales (LL3, LL2, LL1) . . . . .	143
	48. Finding the Root By Taking a Power . . . . .	145
	49. Use of LL01, LL02 and LL03 Scales - Reciprocals . . . . .	147
	50. Going Beyond the Range of the LL Scales . . . . .	149
	51. A Succession of Numbers Raised to the Same Power . . . . .	153

<b>UNIT X. (Continued)</b>	
Lesson 52. Finding the Common Log of A Number (L-scale) . . . . .	155
53. Finding the Natural Log of a Number (LL-scales) . . . . .	157
Unit X Quiz . . . . .	159
<b>UNIT XI. REVIEW</b>	
Lesson 54. Methods of Problem Solution Summarized	161
<b>APPENDICES</b>	
A. Rapid Approximation Techniques . . . . .	165
B. Special Scales and Slide Rules . . . . .	171
C. Some Essentials of Trigonometry . . . . .	175
D. Formulas, Equivalents and Conversion Factors . . . . .	181
<b>INDEX</b> . . . . .	193

#### TABLES

1. Size of Numbers as Measured by the Number of Zeros . . . . .	xi
2. Value of Tertiary Marks on the C and D Scales . . . . .	10
3. Normal Scales and Inverted Scales . . . . .	52
4. Signs of Trigonometric Functions Falling Into Various Quadrants . . . . .	175
5. Formulas (Slide Rule Processes) . . . . .	182
6. Conversion Factors . . . . .	184
